

SL-L30 Velcro Fatigue Tester

Use

The machine repeatedly peels and attaches the hook and loop fastener, so after a certain number of times, the test piece is cut into 75*20mm, and then the test piece is pressed by the weight of the roller to make it evenly fit, and then 4. With the optional tensile testing machine, the adhesion AS and the bonding strength PA were measured, which has the function of power-off memory.

Technical Parameters

Large roller diameter	162.5±0.5mm
Small roller diameter	160.0±0.5mm
Roller width	80mm
Roller speed	60±5cpm/72±5cpm can be set
Controller	PLC control system touch screen display
Volume	45*55*57cm
Power	AC220V50HZ
Weight	55kg

Standards compliant

ISO22776, DIN3415 SATRA TM 123, ISO 22777
